Projects:

Portfolio Website | HTML, CSS <https://uchennad.github.io/Resume-Website/>

- Designed a personal resume website using HTML and CSS to showcase professional skills, experience, and Achievements.
- Implemented live server functionality to enhance the user experience, allowing real-time updates and dynamic content without the need for manual page refresh.
- Optimized the website for various devices and screen sizes for accessibility
- Incorporated interactive elements and multimedia content to engage visitors, providing a comprehensive overview of qualifications.

E-commerce Website | HTML, CSS, Javascript

- Developed an e-commerce website using HTML and CSS for responsive front-end design, with JavaScript managing server-side operations.
- Implemented essential features such as user authentication, product database integration, a search bar, and a settings page to enhance functionality and user experience.
- Designed and deployed a dynamic carousel banner on the homepage to improve site aesthetics and navigation.
- Collaborated in a team to resolve issues, integrate MySQL databases for users and products, and ensure seamless performance and functionality.

Virtual Car Dealership | C++

- Developed a Car Dealership Management System in C++ using object-oriented programming principles.
- Implemented inheritance, polymorphism, and linked lists for dynamic vehicle management.
- Designed features like user authentication, car inventory tracking, and rental options.
- Built a modular and scalable system with efficient memory management.
